

E.1.8.3 (Procedure) International Programs: Measurement and Evaluation

Responsible Department: District Office of International Programs

Based on Board Policy: [E.1.8](#) - International Programs

Approved: 7-28-20

Last Amended:

The Strategic Plan for the internationalization of the Alamo Colleges District defines the objectives for the office. Internationalization objectives include increasing the number of:

- International students enrolled at Alamo Colleges District
- Students studying abroad
- Training programs implemented
- Opportunities for faculty to participate in international activities

In order to measure and assess the progress, efficiency, and relevance of the activities conducted in each of the four strategic areas, the Office of International Programs complies with the Alamo Colleges District's application of the Four Disciplines of Execution (4DX) and all other continuous process improvement and program management methodologies. Evaluation of the objectives associated with these methodologies is conducted as appropriate.

Training programs in the international context must be evaluated within the context of THECB authorization and based on the benefit to the Alamo Colleges District rather than the benefit to the training customer residing outside the Taxing and service areas of the District.
